

Canon v12.2.1 / SGP v8.1.1 Baseline Loss Audit

Result

PASS. Historical sources were used as anti-loss comparators, not as automatically correct wording. Every tested invariant is present in Canon v12.4 or SGP v8.3. No major section loss was detected.

Invariant	Result
Five-stage cascade; no sixth gate	PASS
No-rescue ordering	PASS
Human FPP-100 protection	PASS
Humanity RMCP-P100 distinct anchor	PASS
Open cross-substrate P100; no P101 hierarchy	PASS
Protection, participation, power, capacity, and authority separated	PASS
Unknown not zero; refusal preserved	PASS
Selection separated from authority and execution	PASS
Physical admissibility separated from governance permission	PASS
SGP digital-continuity and precaution safeguards	PASS
Unified severe-rights predicate and rho provenance	PASS
Registered stream and RMCP required-field interfaces	PASS

Claim boundary

This PASS establishes textual, interface, and anti-loss preservation. It does not establish empirical validity of constructs, thresholds, weights, rights classifications, sentence assessment, physical safety, lawful authority, or deployment readiness.
