

MathGov Core Component Map - v12.6 / SGP v8.5

Component	Version	Role	Boundary
RippleLogic Canon	v12.6	Principal governing decision architecture	Open research-source component; does not establish empirical validation or deployment authority.
Sentience Gradient Protocol	v8.5	Moral-patienthood, protection, participation, and power interface	Not a consciousness detector; protection does not grant authority.
ripple.md Standard	v5.5	Portable assurance wrapper	Open research-source component; does not establish empirical validation or deployment authority.
RippleLogic Agent System	v12.5	Runtime controls and execution records	Open research-source component; does not establish empirical validation or deployment authority.
CSV Gate Standard	v2.4	Containment and structural viability	Open research-source component; does not establish empirical validation or deployment authority.
RippleLogic Cascade Standard	v2.6	Compact five-stage implementation map	Open research-source component; does not establish empirical validation or deployment authority.
Reproducibility and Use Standard	v1.4	Minimum replayable operating kernel	Open research-source component; does not establish empirical validation or deployment authority.
WDBIP	v1.6	Welfare-dimension boundary and interaction protocol	Open research-source component; does not establish empirical validation or deployment authority.
RLS Validation Protocol	v2.6	Validation and falsification design	Open research-source component; does not establish empirical validation or deployment authority.
RLS Validation Workbook	v0.3	Level 1 study instrument	Open research-source component; does not establish empirical validation or deployment

Component	Version	Role	Boundary
			authority.
Foundations Primer	v4.4	Informative doorway	Open research-source component; does not establish empirical validation or deployment authority.
Public Introduction	v12.6	Shortest teaching doorway	Open research-source component; does not establish empirical validation or deployment authority.
PC-AEP	v2.3	Physical/causal evidence profile	Open research-source component; does not establish empirical validation or deployment authority.
MFDI Standard	v2.3	Claim typing and falsification discipline	Open research-source component; does not establish empirical validation or deployment authority.
Source-Coupling Integrity Standard	v2.3	Capability-source and source-debt discipline	Open research-source component; does not establish empirical validation or deployment authority.
RippleLogic Aligners Sheet	v5.6	Tier 2 worked-run exemplar	Worked-run exemplar; not a validator or reference calculator.

Governing relationship

The Canon and SGP are principal governing sources. Companion standards implement bounded interfaces. The Primer and Public Introduction are informative. The 15-file core_15 selection contains fourteen DOCX reading mirrors plus the Aligners Sheet workbook; this map is a coordination artifact, not a sixteenth governing component.
